

Covid

Summary of Archpress Covid 19 protocol

We Prepare for a safe visit before we visit any home

The owner/occupier will receive call and will be asked the following questions to find out certain key pieces of information:

- is anyone currently occupying the property
- the owner/occupier will be advised of reason why we are visiting and what work will be done during the visit
- do any of the people occupying the property have symptoms of Covid-19?
- is anyone at the property extremely vulnerable to Covid-19?

All our contractors carry out rapid lateral flow tests on a twice weekly basis the results of these are logged.

We are proud to say that all our staff are vaccinated .

we follow strict hygiene standards

Before entering the premises, our contractors always use hand sanitiser if they are not able to wash their hand with soap and water for 20 seconds

They always wear the following PPE when entering a property

- Masks
- Gloves
- Overshoes
-

We also aim that

- will not be in the house longer than is necessary
- the work will be confined to a certain area
- that we keep a distance of 2 metres to avoid the spread of Covid-19
- If possible, open windows to ventilate the work area, air movement will disperse airborne droplets

After the visit is complete our contractors remove all tools used and wipe with an alcohol based wipe, this is disposed of in the usual way.

After leaving the premises our contractors use soap and hot water to wash their hands for at least 20 seconds, or use hand sanitizer if soap and water is not available.
